

# ADITYA NARAYAN MALI

Full-Stack Developer | Agentic AI / GenAI Systems

07749081504 | adityanarayanmali2020@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## OVERVIEW

Full-stack developer with hands-on experience shipping production-grade SaaS platforms, now expanding into Agentic AI and Generative AI engineering. Skilled in designing multi-agent LLM pipelines using LangGraph, retrieval-augmented generation (RAG), vector databases, and MCP-based tool integrations. Backed by a strong problem-solving foundation of 800+ DSA problems solved, with a track record of quickly learning and shipping new technologies end-to-end.

## EDUCATION

**Odisha University of Technology & Research, Bhubaneswar** (2023 – 2027)

B.Tech – Information Technology, CGPA: 9.27

**Kendriya Vidyalaya Sangathan, Nabarangpur, Odisha**

Class 10 (CBSE): 96.8% | Class 12 (CBSE): 94.4%

## SKILLS

**Languages:** C, C++, JavaScript

**Frontend:** React, Redux, Tailwind CSS, HTML, CSS

**Backend:** Node.js, Express.js, REST APIs

**Database:** MongoDB, SQL

**Agentic AI / GenAI:** LangGraph, LangChain, RAG, Vector Databases (Qdrant), Model Context Protocol (MCP), LLM APIs (OpenAI, Gemini), Prompt Engineering

**Tools & DevOps:** Git, GitHub, Docker, GitHub Actions (CI/CD), VS Code

## PROJECTS

**AgentQ** | *Multi-Agent RAG Pipeline for Autonomous Content Generation & Publishing* ([Link](#))

- Orchestrated a **multi-agent system** (Writer, RAG-Dedup, Publisher agents) using **LangGraph.js state graphs** for autonomous content generation.
- Built a **RAG-based deduplication agent** using **Qdrant vector similarity search**, **similarity scoring**, and **conditional branching** for automated deduplication.
- Integrated a GitHub **MCP (Model Context Protocol) server** enabling **autonomous, tool-based publishing** to a live Next.js portfolio site.
- Containerized the pipeline with **Docker** and automated scheduled runs with **GitHub Actions**, enabling a fully autonomous **CI/CD content pipeline**.

**Tech:** LangGraph.js, TypeScript, Qdrant, MCP, Docker, GitHub Actions, Next.js

**DB-Buddy** | *AI-Powered Natural Language → SQL SaaS Platform* ([Link](#))

- Built a **schema-aware NL-to-SQL engine** that extracts and compresses **database metadata** to ground query generation in **prompt context**.
- Integrated **multiple LLM providers** with a **fallback mechanism**, and built a **SQL validation layer** to guard against unsafe, destructive queries.
- Engineered an **end-to-end query execution pipeline** with per-user **database isolation** and **query audit logging**, delivering **structured, validated results** at **500+ queries/month** in production.
- Architected **plan-based subscription billing** with Razorpay, including **usage tracking** and **tiered access control** for a **multi-tenant SaaS** platform.

**Tech:** React, Node.js, Express, MongoDB, Clerk, Razorpay, Multi-LLM Integration

**TranSmart** | *Personal Expense Manager (MERN Stack)* ([Link](#))

- Built a full-stack expense tracking platform with **JWT-based authentication and authorization** securing **REST API** endpoints.
- Designed and implemented **CRUD REST APIs** managing 1,500+ entries with **<200ms avg. API response time**.
- Built **real-time analytics dashboards** with **Chart.js** to visualize spending and income/expense trends.
- Used **Redux** for **state management** and built a responsive UI with **Tailwind CSS**.

**Tech:** MongoDB, Express.js, React.js, Node.js, Redux, Tailwind CSS, Chart.js, JWT

## ACHIEVEMENTS & CERTIFICATIONS

- Qualified and completed the PwC Advisory Launchpad Program.
- Solved 800+ Data Structures & Algorithms problems across LeetCode and GeeksforGeeks.
- Oracle Cloud Infrastructure (OCI) 2025 Certified AI Foundations Associate.
